

WE THINK
YOU LIVE
BETTER BETTER

ELVIRA

A SENSIBLE SWITCH

DISCOVER
THE THINKING
THAT GOES INTO
MAKING LIFE
BETTER.

Before we started creating a top quality switch, we put you at the centre of our thinking. And while this seemed easy, the thought that

went into creating a superior-quality, longer lasting, greater value-for-money product wasn't an easy task. We focused on attributing it with better features and better functionality, but more importantly, making it more practical. And when it all came together, it just made the best sense.

Elvira: A Sensible Switch.

Because at IndoAsian, *everything* **Makes Sense.**

FEATURES

There are so many reasons why Elvira is the right choice for you. We've listed 12 sound and sensible ways in which Elvira can help you live better. We're sure you will be able to find 12 more.

DESIGNED FOR YOU

Neutral, white colour

Everyone prefers pure and bright white, not because it's simply a better choice but because it's more elegant. It gives you more options and the flexibility to change wall colours.

Built to last

Elvira is also designed to last longer. From curved, screw-free exteriors, to honeycomb base plates, there are even flexible clips for greater stability and strength.

COMPLETELY
COMPATIBLE

Simple 3 pin design

Loose connections are now a thing of the past. The simplified three-pin design has flat and round terminals which means compatibility with all 2 and 3 pin plugs.

SERIOUSLY SAFE

Shrouded terminals

This minimises exposure from accidental contact with live screws and terminals during installation for the electrician.

Base shutters

We've moved the shutter from the top round hole to the base, thereby needing contact from both plug pins and giving complete protection to the curious child.

TOTALLY TRUSTWORTHY

Quality standards

There's a reason why IndoAsian is preferred; the ISI mark is a universally-recognised quality standard. Rigorous testing exceeding 1 lakh On/Off operations means that our switches will last you more than a decade.

HIGHLY DURABLE

High-grade Polycarbonate switches

Our Polycarbonate switches are FR grade with sun protection. They are heat-resistant, flame-retardant and even UV-stabilised. The high grade of Polycarbonate that we use adds to the structural stability.

EXTRA
EFFICIENT

Detailing for installation

Behind every switch we've indicated which side is Top, which means your electrician will always install the products correctly. No mixing up of directions, no time wasted.

EFFECTIVELY POWERED

Unique indicator switches

Our indicator switches are powered with LED, which implies longer life and less energy consumption.

The unique indicator design delivers brightness greater than neon indicators, making it even more efficient.

TRULY PERMANENT

Laser-etched switches

Laser technology replaces printing and painting for easy identification of product ratings and descriptions. All our switches are permanently etched in high-contrast, clear figures and letters that are guaranteed to last long.

The Elvira wiring system consists of switches, sockets and indicators that are functional, yet packed with features. This high-quality range extends to more products that simply improve your life. This includes separate dimmers and fan regulators that aren't interchangeable, call bells and push bells with indicators, skirting lights, and 25A sockets and motor starters.

6A/16A 1way Switch

6A/16A 2way Switch

6A/16A/25A 1way Switch with indicator

6A 3 Pin Universal Socket

10A Euro US Socket

Multistandard Socket 6/10/13A-250v

Fan Step Regulator 100W -1M

TV Socket

Tel Socket - RJ11

Computer Socket
RJ45 Cat 6

Bell Call Indicator

25A Motor Starter

Flat Indicator Red

Skirting Light - 2M

16A Power Unit for
AC/ Geyser

INSTALLATION PROCESS

Installing a sensible switch is a simple process.
Here's how:

Fix the metal box either
into or on the wall.

Press-fit the switch and
socket into the base frame.

Connect the wires
to the switch and socket.

Fix the connected and wired base frame to the metal box.

For a smooth and seamless look, press-fit the cover plate to the base frame.
